

Cow's Milk

SCC Test Strips

for Sub-Clinical Mastitis Screening
& Milk Quality Monitoring

Kit of 50 Test Strips

A Better Way to Measure Somatic Cell Count

EASY - Simple to use with objective, easy-to-read results

FAST - 1-minute testing procedure, results in 15 minutes

AFFORDABLE - Costs far less than lab testing and electronic meters

COWSIDE - Test anytime, no lab required

ACCURATE - Delivers objective results with laboratory-level consistency

VERSATILE - Works with quarter & composite samples

Wide-ranging Applications:

- Test at **dry off** (when infection risk is highest) and **freshening**
- Screen **first-calf heifers** and **high-risk** cows
- Monitor **treated cows** recovering from mastitis
- Evaluate **purchased cows** before herd introduction
- Perform routine **preventative herd health screenings**
- Check cows before **insemination**
